

Cheng-Shie Wu, Ph.D., FACR, FAAPM

Cheng-Shie Wu received his Ph.D. in Radiation Biophysics from University of Kansas in 1985. After completing his clinical training in medical physics at Yale University he joined the Department of Radiation Oncology at Columbia University as faculty member in 1988. Dr. Wu is currently Professor of Clinical Radiation Oncology (also in Environmental Health Sciences and in Applied Physics & Applied Math) and Director of Medical Physics. He has been very active in teaching both graduate students and residents in the past 22 years at Columbia University. He is the Co-Director of Medical Physics Graduate Program at Columbia. His research interests are: microdosimetry, radiation biophysical modeling, gel dosimetry, second cancers induced by radiotherapy, and transit dosimetry with an electronic portal imaging device.
