

Jairton Dupont has received his Ph.D. at the Université Louis Pasteur of Strasbourg (France) and after a period as pos-doc at the University of Oxford (UK), he became a Professor of Chemistry at the Institute of Chemistry, UFRGS (Brazil). He has been invited as Professor at ULP (France), Nuremberg-Erlangen (Germany) and Universidad de Alcala de Henares (Spain). He is member of the Brazilian Academy of Sciences and has received the Humboldt Research Award. His research interests are mainly centered in ionic liquids with special emphasis in catalysis, nanomaterials and alternative energies. He has authored around 200 scientific publications and several patents and book chapters.
